DATA ANALYST

Currently pursuing a Master of Science in Business Analytics at Wake Forest with a concentration in Sports Analytics. Built pipelines feeding dynamic dashboards across finance and inventory internships, turning complex source data into decision-ready insights. Now leveraging those same analytical and engineering skills to solve high-impact problems in sports.

EDUCATION

Wake Forest University School of Business, Winston-Salem, NC

Master of Science in Business Analytics, May 2027

Concentration: Sports Analytics

University of Arkansas, Fayetteville, AR

Bachelor of Science in Data Science, Business Analytics, May 2026

Minor: Statistics | GPA: 3.52

AREAS OF EXPERTISE

Sports Analytics | Business Intelligence | Data Visualization & Dashboard Design | Statistical Analysis
Data Collection & Data Mining | Predictive Modeling | Machine Learning | AI Prompting & LLM Applications
Data Pipeline Development | SQL & Database Management | Process Automation | Stakeholder Communication

TECHNICAL SKILLS

DATA VISUALIZATION & BI TOOLS: Power BI, Tableau, Excel (Power Query, Power Automate)
DATA COLLECTION & MINING: SQL extraction, Google Maps API, ETL, data enrichment, cleaning and validation
PROGRAMMING LANGUAGES: Python (Pandas, NumPy, Matplotlib, Plotly, Jupyter, PyTorch), SQL, R
AI & LLM APPLICATIONS: Prompt engineering, LLM APIs, AI-assisted analysis and development
CLOUD & INFRASTRUCTURE: Google Cloud Platform, Azure, Databricks, Streamlit, Flask

PROFESSIONAL EXPERIENCE

FINANCE INTERN | **The Shaw Group** | Remote, Fayetteville, AR

February 2026 - June 2026

- Gathered validation requirements from finance stakeholders and delivered SQL-backed pipelines and Power BI dashboards for period-accurate AR and AP validation and cash/aging visibility across 12 business units
- Executed mass data conversion for a system migration, enriching incomplete records through both manual and API-driven audits
- Audited the general ledger across purchase orders and invoices, flagging miscoded entries and improved financial reporting accuracy

DATA ANALYTICS INTERN, INVENTORY | **Shrieve Chemical** | The Woodlands, TX

May 2024 - October 2025

- Mined inventory and transaction data to flag excess and obsolete stock, deploying automated pipelines that surfaced issues to decision-makers in real time
- Delivered interactive dashboards for live monitoring of inventory health, annotating anomalies for business users
- Trained executives on dashboard use and inventory pipeline monitoring, enabling self-service analysis
- Replaced manual logistics reporting with an automated Python-based workflow

ANALYTICAL PROJECT EXPERIENCE

DATA SCIENCE CAPSTONE | **University of Arkansas**: Designed sport stackable end-to-end data pipelines consolidating wearable sensor data from multiple platforms to support athlete monitoring. Created infrastructure to model and monitor transfer-risk.

MADDEN FRANCHISE COMPANION | **Personal**: Built a full-stack Flask application with SQLite and LLM integration simulating an NFL front office through contract management, roster tracking, AI-generated narratives, and analytics dashboards.

HONORS & INVOLVEMENT

UNIVERSITY OF ARKANSAS | **Fayetteville, AR**

- Team Lead, Data Science Practicum, Spring 2025
- Chancellor's List, Fall 2024, Spring 2025, Fall 2025

MIT SLOAN SPORTS ANALYTICS CONFERENCE | **Boston, MA**

- Student Attendee, March 2026

ATHLETICS & INTERESTS

- 4-Year Varsity Golfer | Competitive Amateur Golfer
